

Magazine Rack
Plans by The Handyman's Daughter™
Copyright 2020

Materials Needed - [See tutorial for links to sources](#)

- One 1x3 board
- Pocket hole jig
 - Read my [comparison of the Kreg Jig R3 and K5 here](#).
- 1 1/4" pocket hole screws
- Drill
- Countersink bit and 1 1/4" flat head screws
 - I used a brad nailer and 1 1/4" brad nails instead of [countersinking screws](#).
- Wood glue
- Wood filler
- Miter saw or circular saw
- Paint
- Acrylic or leather strip (optional)
- Hanging hardware or Command strips

Cut List

1x3 board

Back and bottom - 16 1/2"

Front - 18"

Sides (2) - 12"

Acrylic strip - 1" x 18"

Instructions

- ❑ Cut all the 1x3 pieces according to the cut list above. Drill pocket holes as follows:
 - ❑ Back piece - both ends
 - ❑ Bottom piece - both ends
- ❑ Attach the bottom to the sides with wood glue and 1 ¼" pocket hole screws.

- ❑ Attach the back to the sides, flush with the top and back edges of the side pieces, with wood glue and 1 1/4" pocket hole screws.

- ❑ Cut the front piece to fit. It should be 18", but lumber dimensions can sometimes vary.
- ❑ Attach the front to the sides and bottom with wood glue and brad nails.
 - ❑ Alternatively, you can drill countersink holes along the bottom and sides and attach it with 1 ¼" flat head screws.
- ❑ Hide nail and screw holes with wood filler, then sand smooth.
- ❑ Paint before attaching the acrylic strip.

- ❑ Cut a 1" wide strip of thin acrylic to the width of the magazine rack. You can find my tips and tricks for cutting acrylic [here](#).
- ❑ Predrill holes in both ends of the strip, slightly larger than the diameter of the screw shaft.
- ❑ Attach the acrylic strip to the front of the magazine rack with small screws.

- ❑ Attach hanging hardware to the back of the rack and mount it on the wall! You can also drill holes through the back piece and screw it into the studs if you want to hold heavier books instead.
